Eddy Current Separator

Brochure

Description

The Eddy Current Separator is an advanced metal sorting unit that is capable of separating non-ferrous metals such as aluminum and copper from dry recyclables.

Eddy current separation is based on the use of a magnetic rotor with alternating polarity, spinning rapidly inside a non-metallic drum driving by a conveyor belt. Material is fed onto the conveyor belt of the eddy current separator, which moves it across the magnetic rotor where separation occurs. As nonferrous metals pass over the drum, the alternating magnetic field creates eddy current in the non-ferrous metal particles repelling the material away from the conveyor. While other materials drop off at the end of conveyor, the non-ferrous metals are propelled forward over a splitter for separation.

Applications

Eddy current separation equipment can be used to remove non-ferrous metals from municipal solid waste, auto shredder residue operations, glass cullet, electric scrap, UBC reclamation, etc.

- Separation of non-ferrous metals in auto shredder residue;
- Separation of non-ferrous metals from solid waste incinerator ash;
- Sorting of aluminum beverage cans from on-magnetic recyclables;
- Removal of non-ferrous contamination from crushed glass cullet;
- Separation of non-ferrous dross from foundry sand;
- Non-ferrous metal removal in WEEE recycling plants;
- Removal of aluminum components in UPVC window recycling;
- Separation of non-ferrous metals from plastics;
- Separation of non-ferrous metals from electronic scrap;
- Separation of non-ferrous metals from car recycling applications.

Features&Benefits

- 1.Excellent recovery of heavy non ferrous metals;
- 2.Designed with top grade rare-earth magnetic material;
- 3.Adopt Intelligent touching control,VFD technology;
- 4.Use high quality components to ensure reliable in long-term operating;
- 5.Designed for minimal and easy maintenance;
- 6.Special magnets system protection mechanism preventing dropping off of magnets;
- 7.Designed for lower noise and minimal vibration

Technical Specification

Type	Belt				Power (kw)	Weight (kg)	Size		
	Feeding width (mm)	Feeding length (mm)	Feeding	Capacity (m3/h)			Length (mm)	Width (mm)	Height (mm)
GTFX-4	400	1500	$\geqslant 1\text{mm}^2$	4	7	600	4600	1660	1700
